*Epoxy Flake Systems are great for indoor basements and garages.*

*Concrete is prepped to receive system followed by an epoxy flake system for a great look that is easy to maintain*

Concrete Ink can demo your existing flooring to expose concrete surface followed by a process of profiling, hardening, and polishing. We finish up with a sealer/guard (stain can be added) to leave a beautiful, easy to maintain floor that will last a lifetime.

*Grind & Polish for indoor*

*Large Aggregate Grind & Polish is a high-end look to restore, strengthen and beautify your concrete surface.*

*Concrete is strengthened by removing the cream and exposing the large aggregate surface with a diamond polish to leave a one-of-a-kind beautiful low maintenance surface that will last a lifetime.*

*Large Aggregate Grind & Polish for Outdoor patio, driveway, porch, etc..*
